

Restore College Wrestling – Montana

About us

Who are we?

We are concerned individuals from all walks of life who want the four dropped college wrestling programs in Montana to be restored. MSU-Bozeman, U of M, Montana Tech and Miles City CC.

What do we do?

The primary goal of the Restore movement is to educate post secondary institutions of learning about the value and practicality of reinstating, maintaining and supporting a wrestling program.

How do we do it?

We use existing community based structures for fundraising and legislative support. We organize and unify all wrestling organizations and concerned individuals to create a state, district and community network for communication, leadership and self-governance.

Why should anyone care enough to support us?

"In today's society, wrestling plays a crucial role. It teaches discipline, hard work and goal setting - the very same values which made America great! Wrestling is mankind's oldest sport and America needs wrestling today more than ever."

High school principals are having problems finding qualified wrestling coaches due to the dropped collegiate programs. This loss of opportunity presents two problems for our sport:

our next generation of wrestling coaches comes from the collegiate programs, and

our high school graduates want to have the opportunity to wrestle in college, like we once had.

If we don't fix the problem, who will?
